For the 2023 Season of Creation, EarthBeat will recirculate nine "Creature Features" through a twice-weekly newsletter. Each Tuesday and Thursday from Sept. 1 to Oct. 4 subscribers will receive an email with an original illustration of the day's creature by graphic designer and illustrator Ryan McQuade along with a preview of and link to

an essay or report on EarthBeat that highlights that creature.

There will also be a corresponding series of posts on EarthBeat's Instagram account, so make sure you're following [@earthbeatncr](https://www.instagram.com/earthbeatncr).

Sept. 1: World Day of Prayer for the Care of Creation

["How to pray the Lord's Prayer with all creatures"](#)

By Collin Cornell

April 19, 2022
